

The meeting with the Master Botta in Ugolini's home

In a spontaneous meeting, looking at and talking about the plants and the work of Claudio Botta, we have created an atmosphere to address the theory of "spiriteria".

The Master, like it is the reincarnation of one of powerful and secular oak logs, painted by him, brought out the soul hidden under the bark of a large plant! We can better understand the importance of vegetable nature, essential for human and animal life.
